Career Objective

Creative full-stack developer who is passionate about developing modern-looking websites. Good understanding of MERN Stack and comfortable with NextJS and other front-end technologies. I apply my skills to make websites better and faster with a user-friendly interface. I am aiming to grow within a team and believe that I can contribute to projects while gaining more skills, and continue to grow as a full-stack developer.

Skills

Expertise: JavaScript, ReactJS, Firebase, Tailwind, HTML5, CSS3.
Comfortable: NextJS, NodeJS, ExpressJS, MongoDB, Bootstrap.
Familiar: Axios, RestAPI, JWT, React Libraries.
Tools: Git & Github, VS Code, Netlify, Vercel, npm, Thunder Client. Figma
Soft Skills: Leadership, Teamwork, Adaptability, Bilingual Communication

Project

Home-Chepo (November 25 - November 25)   Live | Client | Server
A modern-looking website built with NextJS, providing clean UI and smooth navigation, Home-Chepo is an e-commerce website. With admin access, you can create and update any products from the MongoDB database, and also be able to delete them at the same time. Using the data from a server deployed in Vercel, and the front-end being on Netlify provides a seamless experience.

- **User-friendly Interface:** Built with Next.js for fast rendering, clean UI, and smooth page transitions, giving users a polished e-commerce browsing experience.
- **Product Management:** Authorized person can create, update, and delete products directly from a MongoDB database, ensuring full control over the store's catalog.
- **Stable Performance:** Built with a scalable API that can be used as a large website.

Study-Mate (October 25 - October 25)   Live | Client | Server
A website built with ReactJS, Firebase, and MongoDB, and with the wisdom of choosing your perfect study partner based on your own criteria and filtration, Study-Mate is a study partner finding website. Makes the modern busy day easy by helping you find your best match in interest, allowing you to grow and shine together. Users can add and update, and delete partners as well.

- **Personalized Partner Matching:** Users can find study partners using criteria and filters, and ensure compatible and productive study mates.
- **Crud Functionality:** Users can add, update, and delete partner profiles seamlessly, keeping their connections and information up-to-date.
- **Real-Time Data & Scalable Backend:** Created with Firebase and MongoDB for a fast and smooth backend experience.
